

PARACHUTE VALIDATION

The parachute validation process is mandatory for any person who plans to skydive in Romania and does not hold Romanian documentation for their parachute.

This process must be initiated at least 3 working days prior to arriving at the dropzone to ensure that all necessary approvals can be obtained from romanian authority.

Failure to complete this process in advance may result in being unable to use your own skydiving rig in Romania.

Please follow the steps presented in this document.

PARACHUTE VALIDATION

1

Required documents:

- Valid ID or Passport
- Parachute Data Card or other document. Must include all components with their corresponding model names and serial numbers: Container, Main Canopy, Reserve Canopy.

* If your main canopy is not listed on the data card(or other document), you must provide a clear photo of the manufacturer's warning label.

** The reserve canopy repack must be valid and recorded on the data card(or other document). A certified rigger's signature is mandatory.

[Check example here](#)

3

Please complete the forms accordingly. Most of the required information is self-explanatory. Kindly follow the guidelines below:

- "Parachute document no." – Leave blank if you only have a data card.
- Components section – Must include the model and serial number for each component.
- "Valid until" – Enter the reserve repack expiration date or document expiration date (if applicable).
- "Documents checked at" – Enter "TNT Brothers".
- "Date of validation" – Enter your planned arrival date at the dropzone.
- "Drop zone" – Enter "TNT Brothers".

**The forms must be completed and signed in handwriting.*

PARACHUTE VALIDATION

5

Once you arrive at the dropzone, please ask our staff for guidance to complete the process.

You will need to present:

- Valid ID or Passport
- Parachute data card or equivalent parachute documentation
- Completed forms (in original, physical format)
- Confirmation email received after submitting your request.
